Professional Summary

Java Backend Developer with hands-on experience in Java, Spring Boot, REST APIs, Microservices, Kafka, MongoDB, and MySQL through real-world projects. Skilled in building secure and scalable backend applications using Spring Security and JWT Authentication. Previously worked as a Technical Support Engineer, developing strong troubleshooting and problem-solving skills. Seeking opportunities as a Java Backend Developer or Spring Boot Developer.

Technical Skills

Programming
Java, OOP, Collections Framework, Exception Handling, Multithreading, Data Structures

Backend
Spring Boot, Spring MVC, Spring Security, REST APIs, JWT Authentication, Microservices

Database
MySQL, MongoDB, SQL, JPA, Hibernate, Spring Data JPA, Spring Data MongoDB

Microservices & Messaging
Apache Kafka, Netflix Eureka, Spring Cloud Gateway, Service Discovery, API Gateway

Tools
Maven, Git, GitHub, Postman, Eclipse, Spring Tool Suite (STS)

Core Competencies
RESTful API Development, Authentication & Authorization, SDLC, Debugging, Troubleshooting, Agile Development

Projects

Food Delivery Microservices Application
Tech Stack :Java 17, Spring Boot, Spring Security, JWT, MongoDB, Kafka, Eureka, API Gateway

- Developed 6 independent microservices for Authentication, User, Restaurant, Order, Payment, and Delivery management.
- Implemented JWT-based authentication and role-based access patterns for customer, restaurant-owner, delivery-agent, and admin workflows.
- Used Eureka service discovery and an API Gateway for service registration and centralized request routing.
- Integrated MongoDB for service data and Kafka-based event messaging for order-related notifications.
- Documented local setup and API testing workflows to help run and verify the services.

E-Shop — E-Commerce Backend Application
Tech Stack : Java, Spring Boot, Spring Security, JWT, REST APIs, JPA/Hibernate, MySQL

- Built backend functionality for e-commerce workflows, including user, product, category, cart, and order-related operations.
- Applied Spring Security and JWT-based authentication with role-based access control for protected endpoints.
- Added request validation and centralized exception handling for consistent API error responses.
- Used persistence mapping and transaction-oriented service logic to manage application data.

Professional Experience

Technical Support Engineer, *Bahujan Samaj Shikshan Prasarak Mandal's College* 2021 – 2024
North Maharashtra University

- Supported and maintained computer laboratory systems, ensuring availability of hardware and software resources.
- Diagnosed and resolved software, application, and system-related issues for students and staff.
- Performed troubleshooting, system configuration, and routine maintenance activities.

- Maintained system readiness and coordinated issue escalation for complex technical problems.
- Developed strong analytical, problem-solving, and customer support skills in a technology-focused environment.

Education

Bachelor of Engineering (B.E.) Computer Engineering, 2020
S.S.V.P.S. B.S.D. College of Engineering North Maharashtra
CGPA: 7.3 University
